ALUMINIUM DOOR THRESHOLD SYSTEM

PM

**ALUMINIUM DOOR
THRESHOLD SYSTEM**

The threshold is an essential door component. The threshold is subject to intense wear and tear, so it needs to withstand mechanical stress.

It is equally designed to ensure a tight seal - with permeability barrier function and acting as a barrier to dust and temperature.

WELDING CORNERS

Made from ABS (Acrylonitrile butadiene styrene), with openings on all 4 sides inside the steel reinforcement. Give a high resistance to twisting and increases the door rigidity. The multitude of dimensions allows the use regardless of the type and thickness of the reinforcement.
